<p style="text-align: center;">PART THREE: READING COMPREHENSION</p> <p>ILO has estimated that ٢٠٠ million children work in developing countries. Sixty-one percent of these are in Asia, ٣٢% in Africa, and ٧% in Latin America. Most working children in rural areas are found in agriculture, urban children work in trade and services with fewer in manufacturing and domestic services such as delivering newspapers. (١ p)</p> <p>٣٣) <i>According to ILO where do we find the most number of working children?</i> <i>d. Eastern Europe c. Asia b. Latin America a. Africa</i></p> <p>٣٤) <i>Agriculture has attracted more working children in rural areas. (true – false)</i></p> <p>Luna is a beautiful world that lies some ٣٨٤,٤٤٠ kilometers from Earth. It is full of mountains, valleys, and many bowl like holes called Craters. Luna is a clean world to explore because you can see it without any telescope. I know you have seen it; in fact you may even see it tonight that is because Luna is our moon. (١,٥ p)</p> <p>٣٥. Luna is another name for moon. (T / F)</p> <p>Child labor is a big problem all over the world, especially in developing countries. Africa and Asia together contain ٩٠ percent of child employment. Child labor especially exists in rural areas. Children work for a variety of reasons, the most important being poverty. Though children are not well paid, they are still a big help to family income in developing countries. Schooling problems also cause child labor, whether it is lack of schools or the lack of quality education which makes parents enter their children into jobs. Social roles in certain countries further limit education and increase child labor. (١,٥ p)</p>	<p>٧</p>

The Sardine is a very valuable food fish. It is found in the coastal waters of many parts of the world where the water is not too warm or too cold. The great sardine territory of the United States is off the coast of California. Every year thousands of tons of sardines are caught there.

Until recently, not very much was known about the sardine's habits. Now scientists have discovered some things about the life of the sardine. The female sardine begins to lay its eggs when it is between 2 and 4 years old. It is then about eight inches long. The female lays about 100,000 eggs, which float on the surface of the water. The eggs hatch in two or three days.

Sardines are a healthful food that contains many rich oils and vitamins. They are usually canned, and are eaten in salads and sandwiches. Some of the best sardines come from the coasts of Norway and Portugal. The sardine is used also as a food for cattle and chickens, and young sardines are used by fishermen as bait to catch other fish. The oil of the sardine is used in many ways.

34. Sardines are found in waters of average temperature.
35. Americans eat thousands of tons of sardines every year.
36. Scientists still do not know very much about the sardine.
37. The female sardine begins to lay eggs when it is eight years old.
38. People can use sardines to make salads and sandwiches.

۳۵. The Web is actually one special area of the Internet. Other areas include newsgroups, mailing lists and chat. We understand from the sentence that
- the Web is more useful than the Internet.
 - the Internet is more specific than the Web.
 - the Internet is much wider than the Web.
 - the Web has other areas including newsgroups, mailing lists and chat.
۳۶. Three months after starting school, Edison ran away. His mother was forced to teach him at home. We understand from these sentences that Edison
- was not educated at all.
 - was forced to go to school by his parents.
 - ran away from his house.
 - didn't go to school more than three months.

- I- Read the following passage and match each paragraph with one of the headings
(main idea). Write letter (A, B, C, D) in front of the numbers of the paragraphs. (۲)
- (A) Kinds of writing
(B) Effective communication by using writing skills
(C) Writing skills
(D) What is writing?
- () ۳۷. Writing is an ancient art and a modern necessity. It first began with marks on stones. Today we use pen and pencils on paper. These are now our main tools for writing. These tools can be bought by anyone; however, the ability to use them to express ideas cannot be bought. It must be learned through practice.
- () ۳۸. A person needs several writing skills before he can express himself well. The most important of these are correct grammar, sentence patterns, punctuation and capitalization. Without these, it is very difficult to communicate with others in writing. The way we put words together is the main thing that tells other people what we are thinking about.
- () ۳۹. One of the most useful and most common forms of communication is letters. We all like to hear from our friends, our brothers and sisters, and our parents. We also like to write to them about ourselves, our experiences, and many other things. Letters are a very practical form of writing and one in which we can use any kind of writing that we want. Usually, however, we write narratives, descriptions or explanations.
- () ۴۰. You will sometimes find that these three kinds of writing are combined with each other. Descriptive writing, for example, may form an important part of a story or of an explanation. Many story tellers like to give descriptions to make their stories seem more exciting and more real. As a person writes narratives stories, descriptions, and explanations, he gradually develops his ability to express himself

more clearly. He also finds that he is able to communicate his thoughts and ideas to others more effectively.

J- Reading Comprehension: Read the following texts carefully, then answer the questions by choosing the best choice.(۲)

About ۲۰۰ million years ago, much of the earth was very warm and wet all year. This heat and wet weather caused thick plants and tall trees to cover the land and make jungles where many interesting animals began to appear.

Dinosaurs were a group of animals that lived on the earth for about ۱۴۰ million years. There were no men in the days of the dinosaurs, so no one has ever seen a living dinosaur. But their fossils have been found in rocks. Studying their fossils gives us facts about them. For example, the shape of dinosaur's teeth tells us that some dinosaurs ate only plants and some of them ate other animals. Some dinosaurs were as big as locomotives, others were as small as cats.

Then, after millions of years, something happened to the dinosaurs. Suddenly they began to die out. Many people believe that maybe dinosaurs died out because of a change in the earth's weather. The climate might have cooled suddenly, killing the dinosaurs. But no one knows of certain.

۴۱. The passage says that..... ۲۰۰ million years ago.

- a. all the land was warm and wet all year
- b. the weather was dry and hot
- c. much of the earth was hot and wet all year
- d. the weather was not very warm and wet

۴۲. We get information about dinosaurs by

- a. studying weather condition
- b. studying their fossils
- c. learning how they came to the world
- d. discovering the hot jungles around the world

۴۳. The reason why dinosaurs died out was probably

- a. the heat of the earth
- b. their large size
- c. having no food
- d. a sudden change in climate
